
NewNet Win Top Prize in National Awards

Fareham-based Communications Provider NewNet triumphed at the Internet Service Providers' Association (ISPA) awards this week, beating four other finalists to the top prize for Best Dedicated Hosting.

The prestigious ISPA awards celebrate the best of the internet industry and recognise outstanding achievements by Internet Service Providers including class of service, innovation and best practice. As well as close examination of these areas, the judges also undertook rigorous technical tests to measure the download speed and availability of the service. In an extremely competitive category, the judges decided that NewNet's wide product range, provision of 24/7 technical support and a dedicated account manager set them apart from their competitors.

Calum Malcolm, Operations Director at NewNet plc commented

"We are delighted to have won this award. We believe we deliver a truly outstanding service that is both robust and innovative, and we're delighted to receive this recognition from the ISPA Awards."

Sales Director Paul Schneider added:

"This award backs up all of the hard work and effort that the entire NewNet team have put into creating a market-leading and innovative hosted solution for the UK market place. Our sales team are very grateful for the rewards they have reaped as a result." The company were also runners-up in three other categories at the awards - receiving more nominations than many major players such as BT, O2 and Virgin and further cementing their reputation as one of the most successful companies both within the region and the industry.

Committed excellence within the industry, NewNet have strongly invested in increasing their presence within the Hampshire, Surrey and Berkshire regions in order to provide bespoke broadband and network solutions at uniquely competitive rates for both business and consumer clients. In addition, NewNet's vast experience allows each client to receive individual customer service and support that is completely tailored to suit their needs.
