

## Uploading Your Website

### How do I upload my website to my Powerhost account using FTP?

To upload to your Powerhost account using FTP you will need:

- \* An Internet connection (NewNet ADSL is recommended).
- \* An FTP client application (for example SmartFTP).
- \* Your Powerhost username and password.

**1** Start your FTP client application and opt to open a new FTP connection. Enter "ftp." followed by your domain name (for example "ftp.newnet.co.uk") in the text box for the FTP address, and enter your Powerhost username and password.

**2** Press the enter key, or click "connect" to access your Powerhost account using FTP. If your attempt to connect is successful then you should see a list of folders - one for each domain name on your Powerhost account, and a "logs" folder.

**3** To upload your website simply drag and drop your website files from your computer into the folder in the FTP client application for your domain name.

### How do I upload my website to my Powerhost account using the Powerhost File Manager?

To upload to your Powerhost account using the file manager you will need:

- \* An Internet connection (NewNet ADSL is recommended).
- \* A web browser (for example Internet Explorer).
- \* Your Powerhost username and password.

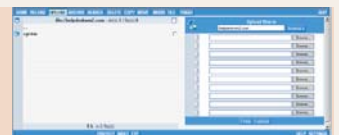

**1** Login to your Powerhost control panel using your username and password and click on "FTP/User Account" in the control panel main menu to the left of the page.

**2** The "FTP User" control panel page should now be displayed. To open the Powerhost File Manager click on the "File Manager" link to the right of your username. This should open the Powerhost File Manager in a new web browser window.

**3** To upload your website simply click on the folder for your domain name in the file manager and click on the "upload" button at the top of the window. Use the form that appears on the right of the page to select your website files and click "upload" to finish.

### What is "uploading" a website?

The process of uploading a website to a Powerhost account means that you are copying the files that make up your site, such as image files and HTML webpages, to a Powerhost server. This will allow people to view your website 24 hours a day, and 7 days a week, around the world.

### Where can I get an FTP client application?

There are many free and low-cost FTP client applications available. These can be downloaded from software sites such as <http://tu cows.newnet.co.uk>.

**order ADSL now at [www.newnet.co.uk](http://www.newnet.co.uk)**  
**order Powerhost now at [www.newnet.co.uk](http://www.newnet.co.uk)**
