Where:

"A" - the **Availability** of the service (expressed as a percentage).

"Y" - Minutes of **downtime** in 1 calendar month

"X" - Total minutes in 1 calendar month based on 1 minute past midnight on the 1st to midnight on the last day of the month.

Calculation of Downtime

Downtime is calculated from the time of notification of a fault by either the Company or the Customer, and ends when the service is restored to full working order. These times will be logged and notified via e-mail.
